

CLEAN CITIES SWEEP SCHOOL PROJECTS

MARCH-APRIL; K-12TH GRADE

Free supplies for registered Schools

Registered schools are provided with Glad bags, gloves, a Colorful Can, and more.

Students and teachers plan and conduct cleanup and beautification projects that positively impact the local community and environment. Schools submit a decorated tri-fold poster illustrating how their project impacted the school and the community. The posters and final reports are used to assess the Clean Cities Sweep project's impact on the students and community and the top schools are recognized at City Council in the spring.

Projects include: School cleanups, community/park cleanups, creating gardens, recycling drives, educational presentations, murals, volunteering with environmental organizations, waste reduction initiatives, and more.

Colorful Cans: Schools compete to create the most inspiring "litter preventing" trashcan. Cans are used in City parks to encourage proper waste disposal. Student artwork should portray a litter-free Charleston. Finished cans debut during the Cooper River Bridge Run.

Supplies are possible thanks to support from [Keep South Carolina Beautiful/PalmettoPride](#) and [Keep America Beautiful](#).
